

PELUOLA DAVID

Frontend-Focused Full-Stack Developer

Ogun State, Nigeria • +234 816-2159-752 • hello@dpeluola.com • dpeluola.com • github.com/Adeolu05

EXPERIENCE

Frontend Developer (Instructor & Developer) — Aptech Computer Education 2024 – 2025

- Taught HTML, CSS, JavaScript, and React to cohorts of student developers, designing structured lesson plans and practical exercises that improved student project completion rates.
- Built and maintained the institute's internal web tools and demo projects used as live teaching references during classes.
- Mentored students through hands-on coding sessions, conducting code reviews and debugging support that accelerated learner progress.
- Developed curriculum materials and reusable component libraries in React and Tailwind CSS, reducing lesson preparation time for the department.

Frontend-Focused Full-Stack Developer — Independent Projects 2023 – Present

- Designed, built, and deployed 8+ production web applications using React, Vite, and Tailwind CSS, serving real users across multiple live domains.
- Integrated third-party REST APIs and real-time data sources to power dynamic, data-driven interfaces with minimal latency.
- Built a Python Telegram bot for real-time cryptocurrency price tracking, handling automated polling, message formatting, and delivery to subscribed users.
- Maintained 100% uptime across all deployed projects through proper hosting configuration and proactive debugging.

PROJECTS

Transcript Flow — usetranscriptflow.com

Backend-first transcript extraction utility that processes video links and delivers clean, downloadable transcript files via both a web interface and a Telegram bot. Built for speed and anonymity with infrastructure-grade reliability.

Forever Yours — valentine.dpeluola.com

AI-powered romantic proposal platform built with Google Gemini integration. Users create personalized, interactive digital experiences with custom names, images, and AI-generated vows. Features five curated aesthetic themes, playful UX logic, and shareable digital keepsakes.

BCSS Hub — bccshub.com

Full-featured information and resource hub built with React and Tailwind CSS. Handles dynamic content rendering and responsive layout across devices.

Chef Olamide — chefolamide.com

Professional chef portfolio and booking platform. Designed and developed the full UI with a focus on visual storytelling and mobile-first responsiveness.

Herdentity — herdentity.vercel.app

Identity-focused web application with custom UI components and API-driven dynamic content built with React and Vite.

Inboxx — inboxx-1e45.vercel.app

Messaging-oriented web app with a clean inbox-style interface, built for real-time content interaction and state management in React.

Hijo Platform — hijo.vercel.app

Scalable platform application with multi-section layout, routing, and component-driven architecture using React.

Onion Price Bot — t.me/myoniontokenupdate_bot

Python Telegram bot delivering real-time crypto price alerts to subscribers via automated polling and formatted push messages.

SKILLS

Frontend: React, Vite, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+)

Backend & Tools: Python, REST API Integration, Git, GitHub, CLI

Deployment: Vercel, domain configuration, environment management

Familiar With: TypeScript (learning), Node.js basics, responsive design systems

EDUCATION

B.Sc. Software Engineering

Expected 2028

Miva Open University

CERTIFICATIONS & ACHIEVEMENTS

- Python Web Development — Aptech Computer Education (2025)
- ITF National Coding Programme — Industrial Training Fund (2023)
- Google Developer Program — Active Member
- Google Cloud Innovator

LANGUAGES

English — Fluent
